InciSioN - International Student Surgical Network is an international non-profit organisation recognized as the world's leading Global Surgery network by and for trainees around the world. Formally established in 2016, InciSioN unites almost 5000 members in over 70 countries around the world. InciSioN's work is driven by an International Team, consisting of 52 people from 30 countries speaking a total of 28 different languages. The work of InciSioN goes down to the national level through its National Working Groups, of which 48 are currently established across all world regions. Accordingly, InciSioN provides a platform to contribute to the development of future generations of global surgeons, anaesthesiologists and obstetricians from around the world.

In 2015, InciSioN established Global Surgery Day on May 25th to connect all Global Surgery advocates around the world and promote access to safe surgical and anesthesia care. This year, we celebrate #GlobalSurgeryWeek2023 in conjunction to our InciSioN's #GlobalSurgeryDay2023 which is a 1-week campaign that focuses on Global Surgery and WHA Resolution 68.15. We will be touching several aspects of SDGs and their connections with Global Surgery. Under the theme “WHA 68.15: Strengthening Surgical Care and Anesthesia as Components of UHC” and more!

Our goal is to spread awareness; to ensure surgical care is properly strengthened and incorporated under UHC and to close the gap between numbers of surgical procedures done and the surgical procedures needed and to urge taking action now better than tomorrow. We will be talking about surgical care, LIMC role in global surgery, anesthesia and its importance and lastly emergency obstetrics care through multiple initiatives. We also wanted to gather more supporters to the cause and show that this was a truly international effort, uniting students from all over the world.
